

## SurVIS™ LT16 Series NVR Digital Video IP Surveillance

The LT16 Series of SurVIS Network Video Recorders from VNS, a performance leader in video processing and archiving, is a scalable control and archive platform targeted for mid-range IP video surveillance applications.

VNS NVRs ship with Windows XP PRO and can be configured with commercially available digital video surveillance management software to provide a complete NVR solution. The LT16 series of products optimize performance for medium camera count applications such as strip mall shopping centers, nursing homes, mid-size construction sites and bank branch offices. The NVR provides the ability to record and retrieve video and monitor alarms on a single appliance. Architected for scalability the LT16 platform can be optimized for footprint, video processing power and archive capacity. This flexibility allows VNS to build each LT16 to our customers specifications. VNS NVR systems are designed to work on any networking protocol that supports TCP/IP.

In green field installations or system upgrades, network surveillance systems like those offered by VNS are an excellent choice to meet end user's increasing demands from their security systems.

# VISTA Networking Solutions

## Key Features:

- Real Time - Live simultaneous all channel / camera viewing
- Video motion detection, record on detection
- Intel Pentium 4 Processor and 800 MHz FSB
- Dual 10/100/1000 Ethernet Ports
- SATA RAID (or non-RAID) configuration and DVD+/- 16X RW
- Redundant power and cooling
- Application protection fail over on Operating System drives
- Data protection fail over on storage drives
- Smart Uninterruptible Power source for back up power and smooth system shut down
- Open systems modular hardware

## Software Features:

- Capable of supporting from 2 to 16 cameras.
- View and Record at up to 30 fps per camera.
- Provides high resolution, digital quality, recording.
- Support for integrated synchronized audio and video monitoring and playback.
- Record video to several storage points.
- Easy to operate user friendly interface.
- Secure time stamped and watermarked recordings.
- Searchable archives, frame by frame, or time based folder by folder.
- Manage multi-site surveillance.
- Motion detection.
- Integrates with IP addressable alarm systems.
- Admin password for settings changes.
- Alarm notification by e-mail, pager, cell phone or audio alert on Server.
